

How to Fold Salmon Life Cycle Origami Chatterbox

Step One: Cut along dotted lines (when finished, you should have a square). Fold square diagonally with blank side up to make crease. Open up and fold diagonally the other way (shown in pictures below).

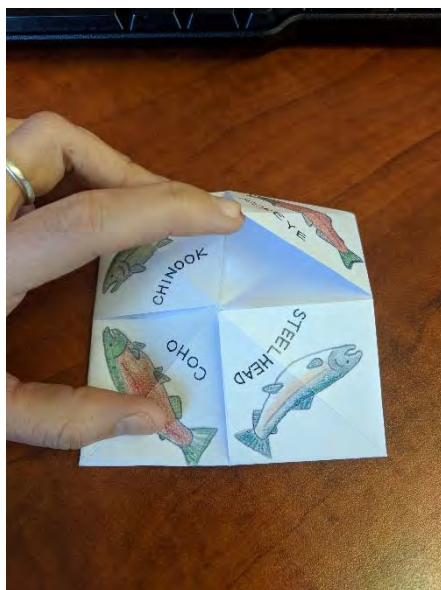

Step Two: Unfold so that right side is down (blank side facing up). Fold each of the four corners so that the point meets the center.

Step Three: Flip over so that the word side is facing up. Now fold each of the four corners so that the point meets the center.

Step Four: Fold in half (creases should already be made, just make them again) both ways.

Step Five: Enjoy your origami chatterbox and learning about salmon!
